

I pay for my service much like cable and satellite TV. I should be given the opportunity to pay for services I want..... and I do not want the mindless, senseless babble that some call entertaining commercials washed up DJ's and no choice. SO why should instant traffic and weather be surrounded only by commercials? I pay for the service to avoid that. And worry about a national service for doing localized reporting? I am in Connecticut... Isn't CLEARCHANNEL a national company? I seem to recall they were.

HR 4026 - NO!
